The minimum fee includes the production of a plan showing the exact siting to 300mm, and one site visit to either check the installation is correct, OR to advise the site agent/installer. These charges don't include the production and installation of nameplates.

The proposed section 38 coloured plan and an approved combined utility plan is required for the production of the siting plan.

The maximum charge is £599.50 + VAT, but a time period of six months is attached to the maximum charge so if you failed to install all the signs under an order in six months, you would be charged again for the remaining number of signs.
